FiberFS Community License v1.0

Copyright (c) 2026 FiberFS LLC

Permission is granted to any person or entity to use, copy, modify, distribute, sell, and create derivative works of FiberFS for any lawful purpose, including commercial and proprietary purposes, subject to the terms of this License.

1. Definitions

1.1 FiberFS

"FiberFS" means the software originally distributed by the Licensor under this License.

1.2 Licensor

"Licensor" means FiberFS LLC and its successors and assigns.

1.3 Covered Software

"Covered Software" means:

(1) FiberFS;
(2) any Derivative Work of FiberFS;
(3) any modification, adaptation, enhancement, extension, translation, port, or fork of FiberFS; and
(4) any work that incorporates any portion of FiberFS source code.

1.4 Derivative Work

"Derivative Work" has the meaning provided by applicable copyright law.

1.5 System

"System" means:

(1) a physical computer, server, appliance, workstation, or device; or
(2) a virtual machine that is assigned dedicated operating system resources and executes Covered Software independently of another virtual machine.

Containers, pods, processes, threads, and similar execution environments running on the same operating system instance do not constitute separate Systems.

For purposes of this License:

- one physical host counts as one System;
- each virtual machine counts as one System;
- multiple containers running on the same operating system instance count as one System; and
- a System shall be counted only once regardless of the number of copies, instances, processes, services, mounts, volumes, filesystems, namespaces, tenants, users, applications, containers, or workloads utilizing Covered Software on that System.

1.6 Entity

"Entity" means any individual or legal person, together with any affiliates controlling, controlled by, or under common control with such person.

2. License Grant

Subject to this License, Covered Software may be:

- used;
- copied;
- modified;
- distributed;
- sold;
- incorporated into proprietary software; and
- incorporated into commercial products.

Source-code disclosure is not required.

Private modifications are permitted.

3. License Continuity

Every copy of Covered Software shall remain subject to this License.

All distributions of Covered Software shall include a complete copy of this License.

No person may use, copy, modify, distribute, sublicense, sell, operate, or otherwise make Covered Software available except subject to this License.

No person may distribute Covered Software under terms that remove, modify, waive, replace, supersede, restrict, or conflict with this License.

Any additional permissions granted by a distributor for Covered Software are permitted only to the extent they do not reduce, eliminate, or conflict with obligations imposed by this License.

The obligations of this License apply equally to:

(1) FiberFS;
(2) all Covered Software; and
(3) all persons and entities using, copying, modifying, distributing, sublicensing, selling, operating, or otherwise making Covered Software available,

regardless of any change in name, branding, product designation, packaging, ownership, distribution model, licensing model, sublicensing arrangement, or commercial offering.

4. Deployment Threshold

Covered Software may be operated on up to thirty-two (32) Systems per Entity without additional authorization. Operation of Covered Software on more than thirty-two (32) Systems is not authorized by this License.

Before operating Covered Software on more than thirty-two (32) Systems, the Entity must enter into a separate written agreement with Licensor.

More information is available at:

https://fiberfs.io/license/

5. Contributions

By contributing to FiberFS (a "Contribution"), you grant Licensor a perpetual, irrevocable, worldwide, nonexclusive, royalty-free, transferable license to use, reproduce, modify, prepare derivative works of, publicly display, publicly perform, distribute, and sublicense the Contribution, in whole or in part, under any terms Licensor chooses. This grant is independent of the restrictions in this License and survives its termination.

6. Copyright Notice and Trademarks

This License grants no rights to use the name "FiberFS", the FiberFS logo, any FiberFS trademarks, service marks, trade dress, branding, or other identifying marks, except for accurate attribution and preservation of notices required by this License.

Except with the prior written permission of Licensor, no person may:

(1) distribute a modified version, fork, derivative work, product, service, or commercial offering using the name "FiberFS" as its product name or branding;
(2) represent that a product, service, fork, modification, or derivative work is endorsed by, sponsored by, affiliated with, certified by, or approved by Licensor; or
(3) use any FiberFS trademark, logo, or branding in a manner likely to cause confusion regarding the origin of a product or service.

Public forks, modifications, and derivative works must use a name and branding that are clearly distinct from FiberFS.

All distributions of Covered Software shall retain all copyright notices, license notices, and attribution notices present in the original FiberFS distribution. No person may remove or alter such notices.

This License does not transfer ownership of any copyright.

7. Termination

Any rights granted under this License terminate automatically upon a material violation of this License.

Termination does not relieve any liability or obligation arising from acts or omissions occurring before termination.

8. Disclaimer of Warranty

THE COVERED SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT.

9. Limitation of Liability

IN NO EVENT SHALL THE LICENSOR OR CONTRIBUTORS BE LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, CONSEQUENTIAL, OR PUNITIVE DAMAGES, CLAIMS, OR OTHER LIABILITIES ARISING FROM OR RELATING TO THIS LICENSE OR THE COVERED SOFTWARE.

10. Entire License

This License constitutes the complete agreement governing the use, modification, distribution, and operation of Covered Software, except to the extent Licensor has entered into a separate written agreement with the applicable person or Entity.

Any separate written agreement signed by Licensor may grant additional rights, impose additional obligations, or supersede this License as expressly provided in that agreement.

11. No Waiver

Failure of the Licensor to enforce any provision of this License shall not constitute a waiver of any future enforcement of that provision or any other provision.

12. Governing Law

This License and any dispute, claim, or controversy arising out of or relating to this License or the Covered Software shall be governed by and construed in accordance with the laws of the State of Wyoming, without regard to its conflict-of-laws principles.
